Art Unit: 2817

DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claim 12 is objected to because of the following informalities: claim 12 which is an apparatus claim depends on a method claim 1. it is suggested that claim 12 should rewrite as an independent claim including the subject matters disclosed in claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 5, 14, 18, 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear which "linearizing module" and "power mode-based signal shaping module" are intended. Note, schematic of the modules discloses in claims 2 and 5 having the exact structure/components.

Regarding claim 2, 14, 18, 21, it not clear which "dual harmonic resonance filter" is intended.

Regarding claims 2, 5, it is not clear which "predistortion linearizer" is intended. Note, [00111], page 33, lines stated that "predistortion linearizer (1135) is a switchable cubic predistorion linearizer". It appears they are the same component. As such, either "a predistortion linearizer" or "a switchable predistortion linearizer" should be deleted.

As best understood, claims 14, 18 are based on invention Figure 11, and that "a dual resonance harmonic filter" is block (1105) and a "bias circuit" is current mirror (32). It is not clear how "dual resonance harmonic filter" is incorporated into the "bias circuit". It appears that they are two independent circuits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto (6,297,694).

Regarding claim 4, Yamamoto (Figs. 1, 2) disclose a power amplifier comprising: a power amplifier load circuit (8) responsive to the power mode signal (Vmod); a bias circuit (5); and filter (10) can be read as an harmonic filter.

Regarding claim 15, wherein bias switching circuit (6) can be read as a switchable cubic predistortion linearizer.

Application/Control Number: 10/807,764

Art Unit: 2817

Regarding claim 16, Fig. 2, wherein transistor (32/36) operable as a current

mirror.

Regarding claim 17, see Figs. 4, 5, disclose a plurality of stages and each having its current mirror (36a-36c) responsive to power mode (Vmod).

Allowable Subject Matter

Claims 1-13, 18-23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Hsiao et al. (6,522,201)) shows further analogous prior art circuitry having power mode.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh V. Nguyen whose telephone number is (571) 272-1767. The examiner can normally be reached from 8:00 AM - 3:30 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.
